Summary

Since December 2019, the Army has benefited from my dedication and problem-solving skills, honed both through my military service and my ongoing education in Electrical Engineering at the University of Arkansas. My previous roles have equipped me with hands-on expertise in HVAC design, evident from my time at Genesis Comfort Solutions, and audio engineering, and quality management methods which I further developed during my internship at Bosch. Our team consistently demonstrates proficiency in soldering and technical tasks, ensuring efficiency and precision in all operations. I am currently still pursuing my education as an Electrical Engineering student at Fayetteville, with hopes to apply my skills and knowledge in an aligning company.

Experience

Army

US Army

Dec 2019 - Present (4 years 6 months)

Quality Management and Methods Intern

Bosch

Jul 2023 - Dec 2023 (6 months)
